

## Process Safety Enterprise®

**Process Safety Enterprise® is a user-configurable, enterprise-level, server-based information management solution for corporate process safety and risk management.**

Process Safety Enterprise® offers all corporate environmental, health, safety, and security professionals a centralized, easy-to-use, web-based platform for managing the lifecycle of critical Process Safety Management (PSM) compliance and engineering data.

### Corporate Edition

Process Safety Enterprise® Corporate Edition offers centralized, visual, and integrated modules for all PSM elements including Management of Change, Incident Investigation, Process Safety Information, PHA and Audit action tracking, etc. These modules include visual workflow, user configurable dynamic database forms, and a multitude of document security, management functions, reporting templates, and Key Performance Indicators (KPI).

Corporate EHSS professionals can use Process Safety Enterprise® to manage all aspects of PSM for both compliance and risk reduction.

Process Safety Enterprise® glues together both structured and unstructured data and enables easy access to that data from one screen. Incorporate Process Safety Office™ (an integrated suite of tools to perform daily process safety and risk management activities) to visualize and track your key performance indicators (KPI) for the entire enterprise.

Process Safety Enterprise® integrates with all Process Safety Office™ components for easy data exchange and transport. Moreover, Process Safety Enterprise® can manage legacy data regardless of form and tool and will enable corporate EHSS departments to streamline and manage any legacy data with ease.

### Small Business Edition

The Small Business Edition is ideal for use by small and medium enterprises that provide professional services. Along with Standard Edition Features, this edition includes specific modules for Time Card, Expense, and Contact Management.

### Standard Edition

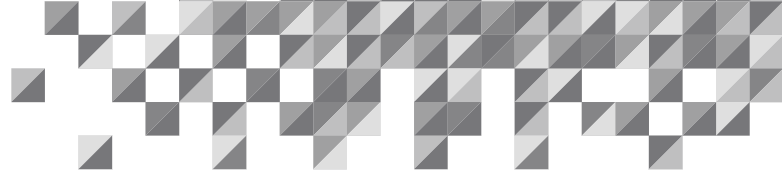

The Standard Edition is a valuable knowledge management tool for any organization which provides Task Management and Action Tracking, as well as Structured and Unstructured Data Management.

Process Safety Enterprise® can be delivered as a hosted application, a physical appliance or virtual machine.

## Feature Comparison Chart

| Component  | Standard | Small Business | Corporate |
|--|----------|----------------|-----------|
| Smart Document Management  | ✓        | ✓              | ✓         |
| PSM Workflows (Management of Change (MOC), Incident Investigation, Relief and Flare Systems, and more) |          |                | ✓         |
| Project Management   |          | ✓              | ✓         |
| Task Management and Action Tracking  | ✓        | ✓              | ✓         |
| Structured Data (Dynamic Forms Management)   | ✓        | ✓              | ✓         |
| Unstructured Data (Knowledge Information)  | ✓        | ✓              | ✓         |
| Time Card Management   |          | ✓              |           |
| Expense Management   |          | ✓              |           |
| Contact Management   |          | ✓              |           |
| Delivery Method  |          |                |           |
| Physical Appliance   | ✓        | ✓              | ✓         |
| Virtual Machine  | ✓        | ✓              | ✓         |
| Installation DVD   | ✓        | ✓              | ✓         |

## About ioMosaic Corporation

Through innovation and dedication to continual improvement, ioMosaic has become a leading provider of integrated process safety and risk management solutions. ioMosaic has expertise in a wide variety of areas, including pressure relief systems design, process safety management, expert litigation support, laboratory services, training and software development.

ioMosaic is an integrated process safety and risk management consulting firm focused on helping you manage and reduce episodic risk. Because when safety, efficiency, and compliance are improved, you can sleep better at night. Our over 300 years of combined industry expertise allow us the flexibility, resources and capabilities to determine what you need to reduce and manage episodic risk, maintain compliance and prevent injuries and catastrophic incidents.

Our mission is to help you protect your people, your plant, your profits, and our planet.

- Auditing
- Chemical reactivity management
- Combustible dust hazard analysis (DHA) and testing
- Due diligence support
- Effluent handling design
- Pressure relief and flare system design
- Facility siting
- Fire and explosion dynamics
- Incident investigation, litigation support, and expert witness
- Liquefied natural gas (LNG) safety
- Pipeline safety
- Process engineering design and support
- Process hazard analysis (PHA)
- Process safety management (PSM)
- Quantitative risk assessment (QRA)
- Risk management program development
- Structural dynamics
- Training
- Software solutions
  - Process Safety Enterprise®
  - Process Safety Office™
