Enable multi-factor authentication in Process Safety Enterprise®

Corporate Communications - 2018-09-01 - Comments (0) - Process Safety Enterprise®

Process Safety Enterprise® provides the ability to implement several layers of security for your data protection. Enable multi-factor authentication for additional security in four simple steps:

1. Login as system administrator
2. Go to the user's profile
3. Expand authentication setting
4. Select authentication type and then click on Save
