Management of Change for Process Safety Enterprise®

Daniel Nguyen - 2017-07-02 - 0 Comments - in Process Safety Enterprise®

 Process Safety Enterprise® with Management of Change Workflow incorporates a workflow and business rules engine that enables management of entire business processes such as MOC, compliance assurance, incident investigation and capital projects. It is designed to easily track action items, approvals, status, etc. for any workflow.

Process Safety Enterprise® also possesses extensive PSM compliance applications. To download a brochure, click on the link below.
