Improved User Interface and SQL Server 2016 Integration in Process Safety Enterprise®

2019-06-11 - Corporate Communications - Comments (0) - News

More Fluidity

A new user interface has been released for Process Safety Enterprise® (PSE) to improve user experience. Features include updated icons, fonts, and graphics to provide more fluidity and enhance the intuitiveness of the platform's functionality. The new responsive design adapts to the evolving needs of the mobile landscape as the interface renders the page to fit any window size.

Improved Functionality

Technical enhancements to PSE now support the installation of the latest version of the SQL Server 2016. This integration enables users to leverage all new features offered by the 2016 version to improve user experience and increase functionality in PSE.
