Introducing ioViewer for SuperChems™

2018-01-26 - Corporate Communications - Comments (0) - News

We are pleased to announce the release of ioViewer – a built-in reporting function for Process Safety Office™ components. This feature was developed to meet the demand from an expanding user base tapping into and analyzing the vast and dynamic data produced by SuperChems™.

ioViewer allows users to generate and view reports from any version of SuperChems™, including SuperChems™ for DIERS and DIERS Lite. Future releases of ioViewer will include integration into other Process Safety Office™ components.

ioMosaic is committed to leveraging the latest technology to maximize tool performance. Check back often to see the latest information about ioMosaic software and technology solutions.
