Learn How To Effectively Mitigate and Manage Refinery Risks

Watch the video for a sneak peek of the latest Process Safety Learning® online course Refinery Hazard Fundamentals. This training is designed to help process safety professionals of all levels understand the principle process safety concerns within refineries, petrochemical plants, and other chemical facilities through the identification of hazard types and their potential risk and consequence. Earn 2 PDHs / 0.2 CEUs upon successful completion.

The Benefits of Process Safety Learning®

- Easy-to-use online training platform
- Quality courses taught by process safety experts
- Convenient – train day or night
- Stay current with evolving requirements
- Reduce expenses (travel and accommodations)
