New Process Hazard Analysis Training

2018-12-11 - Corporate Communications - Comments (0) - News

Build Your Process Safety Competency Incrementally

Improve your knowledge and competencies on process hazard analysis (PHAs) with two new courses available on the ioMosaic online training platform.

PHA Basic Course

Online Training

Learn the essential structure of PHAs and get an introduction to the industry's most popular methodologies such as HAZOP, What-If, Checklist, FMEA, and more.

How to View and Download Certificates After Training is Completed

Process Safety Learning® allows users to track and share information from their completed coursework from My Profile. Upon completion of a learning module, a certificate is provided to the user, which can be viewed, downloaded, and printed following these steps:

1. Expand the "Profile" menu found on the left side of the screen
2. Select "My Profile" from the drop down list
3. Open the "Certificates" tab from the top menu
4. Click on the blue certificate button in the far right column which corresponds to the completed learning module you would like the certificate from
5. Choose to save or open your certificate as a PDF
