New Software Security and Protection Solution for PSE and PSO Products

2018-05-01 - Corporate Communications - Comments (0) - News

We are excited to announce a new software security and protection solution for all Process Safety Enterprise® and Process Safety Office® products.

Users now have the option to stay with the existing hardware key protection device or move to a seamless softkey-enabled solution. In addition to the generic capability to manage user profiles and track usage, other benefits of using the softkey solution include:

- Automatic license check-out option
- Centralized license management interface to manage users
- Ability to share licensing installed on multiple computers
- No more hardware key is needed

Please contact us at 1.844.ioMosaic or support@iomosaic.com for more information on how to upgrade.
